Comprehensive and innovative education for leaders in family medicine.
The UMKC Family Medicine Residency program is accredited by the Accreditation Council for Graduate Medical Education (ACGME).

- **Unique** Comprehensive, unopposed, community hospital, affiliation benefit of large academic institution, and first residency in Missouri to receive ACGME Osteopathic Recognition.

- **Mission Statement** - Provide training to our learners that provides for clear understanding and engagement in the work of the discipline of family medicine while respecting and meeting the individual needs of learners.

- **Clinic First** - Bess Truman FM clinic is a NCQA Level 3 Recognized PCMH. Team includes: residents, faculty, NPs, MAs, LPNs, RNs, care coordinators, staff, social worker, Integrated Behavioral Health experts, Pharm D and in-clinic phlebotomy with point of care testing. Family Medicine run clinics: Continuity, Procedures, Maternal Care, Dermatology, Sports Med, OMT, Peds, Anti-coagulation, Women’s health.

- **Faculty** - Diverse, dedicated, accomplished, committed to excellence in patient care, resident education and environment of inquiry. Many have held or currently hold FM leadership positions on local, regional and national levels.

- **Procedures** - Training in full spectrum procedures include: large volume OB (1,400 deliveries), operative OB, Colposcopy, LEEP, Dermatologic procedures, vasectomy, women’s health, paracentesis, and more.

- **Information Technology** - Truman Medical Centers (TMC) has been named as one of Health Care’s “Most Wired” organizations for the fifth consecutive year by the American Hospital Association and the College of Healthcare Information Management Executives (CHIME).

- TMC is the first Missouri hospital to be awarded HIMMS Analytics’ Stage 7 designation, leveraging IT for patient benefit and closing health care gaps via the Healthe Registry and utilization of our patient portal. Residents receive an I-pad to take advantage of our mobile EMR.

- **Family Medicine Associated Post-Residency Fellowships** - Geriatrics, Sports Medicine and Surgical OB.

**Program Director**
Beth Rosemergey, DO, FAAFP

UMKC is affiliated with Kansas City University (KCU) for post-graduate medical osteopathic education. KCU provides a workshop during orientation to review and assess OMM skills. Our own osteopathic faculty provide teaching throughout all clinical settings and during learning sessions.

Osteopathic residents are encouraged to utilize their osteopathic skills and knowledge to diagnose and treat patients in all practice settings. Residents participating in the osteopathic recognition track will staff OMT clinic an average of 1x/month and are encouraged to perform OMT on continuity clinic patients when applicable.

Residents who participate in the osteopathic recognition track are eligible to sit for boards from both the American Board of Family Medicine and the American Osteopathic Board of Family Physicians. They may take both board examinations, or choose to sit for one board exam of their choice.

OMT interest group is held once a block as a forum for all interested residents to learn basic OMM skills, and for osteopathic recognition track residents and faculty to share OMM skills and expertise.

Maternity and Women’s Health
Geriatric Medicine
Health Informatics
Integrative Medicine
Sports Medicine

POINT-OF-CARE ULTRASOUND (POCUS)

What is POCUS?
An extension of your physical examination skills that allows you to quickly confirm or rule out a diagnosis. It can also be used to increase the success of some procedures.

It is NOT a formal ultrasound that would usually be performed by an ultrasound technician and interpreted by a radiologist.

UMKC has 4 faculty and 2 residents that have received formal training on POCUS and are using their skills to assist with diagnosis and procedures. They are working to train everyone else in the department.

Why POCUS?
Ultrasound is safe and portable. It can be repeated frequently to monitor patient status with clinical interventions. It can be used to evaluate many different structures, from vessels to bones to nerves.

Physicians can bill for POCUS, and UMKC faculty are working towards this in the future.

In the meantime, all residents and faculty are encouraged to use ultrasound frequently as we continue to develop this skill.

Where is UMKC using POCUS?
- Diagnosis of DVT
- Assessment of fluid status
- Confirmation of fetal presentation
- Joint aspiration
- Central line placement
- Evaluation for skin abscess
**DIDACTICS/EDUCATION**

**EDUCATIONAL LEARNING SESSIONS**
- Tuesday Afternoon Didactics
- Grand Rounds
- Journal Club
- Morbidity and Mortality
- Chairman's Conference
- Morning Report

Lakewood Family Birthplace is a 19 room LDRP with private suites and Murphy beds for accommodating family members.
**GERIATRIC MEDICINE**

The 12-month ACGME accredited Geriatric Medicine fellowship program requires a sincere desire to provide care to the frail and elderly. Fellows receive training in patient care, consultation, and teaching. They are taught and supervised by faculty with experience in Geriatric Medicine, Geriatric Psychiatry, Family Medicine, Internal Medicine, Rehabilitation, Hospice and Palliative Care.

**Resident Selection**
Three fellows per year are accepted. The fellowship requires a Missouri medical license and board eligibility in Family Medicine or Internal Medicine.

Fellows receive experience in Long Term Care, Geriatric Assessment clinic, Inpatient Geriatric Psychiatry consultation, Inpatient Surgical Unit consultation, Geriatric Medicine clinic, Primary Care clinic, Rehabilitation and Hospice and Palliative Care. The goal is for fellows to be qualified in the care of elderly patients in all venues including outpatient, hospital and nursing home.

---

**SPORTS MEDICINE**

The Sports Medicine fellowship is a one-year ACGME accredited training program to become confident and competent in the management of athletic health concerns.

The curriculum includes devoted time in the Sports Medicine Center, orthopedic offices, and medical management of Division I and II NCAA athletes in the training room as well as on the sidelines.

In addition, fellows work with athletic trainers and coaches to provide on-going care of high school athletes and on-site presence for practice and competitive sporting events.

Weekly educational didactic sessions focus on sports medicine including preparation for the SM CAQ, and a curriculum focused on MSK ultrasound. Journal club and Radiology conferences occur once a month.

---

**ADVANCED OBSTETRICS**

**OB & Women's Health** is a vital component of Family Medicine, especially for those interested in Academic, Rural and Global Medicine.

- Surgical OB including c-section, postpartum tubal ligations and surgical D & C's
- Mentoring in OB practice management by Family Medicine faculty practicing both in the hospital and in the community
- CME conferences in obstetrics and Women's Health
- Elective time in high risk OB, and GYN with OB/GYN and perinatology faculty
- Academic faculty development training

This is a one year fellowship opportunity with the option to extend to two years.

Truman Medical Centers, the primary community teaching hospital of the UMKC School of Medicine, is a two-hospital academic health system. Together Truman Medical Center Hospital Hill and Lakewood, account for about 22,530 patient admissions a year.

**TMC LAKEWOOD**

TMC Lakewood is home base for the residency program. This 110-bed primary care community hospital and 188-bed long-term care facility provides a full range of diagnostic, therapeutic and rehabilitative services. Family medicine residents and faculty physicians are the primary medical staff of the hospital. Within the Department of Community & Family Medicine there are consulting internists and pediatricians. Subspecialty consultation services are available in the inpatient and outpatient setting.

On the Medical Surgical Inpatient units, each patient is provided with a private room. Lakewood Family Birthplace provides 19 dedicated labor-delivery-recovery and postpartum (LDRP) rooms and a Level II NICU.

**TMC HOSPITAL HILL**

Truman Medical Center Hospital Hill embodies the legacy of health care that began with the opening of City Hospital in 1872. Today, the 249-bed medical center is recognized for its broad range of acute and outpatient care. TMC Hospital Hill has one of the highest number of ER visits (57,787) of any health care institution in the metropolitan area. It also boasts a neonatal intensive care nursery and extensive women’s health care services.

The population at TMC Hospital Hill provides residents with ample and diverse educational and research opportunities. Residents are responsible for patient management under the supervision of senior residents, attending physicians, and a full complement of consultant subspecialists. More than 17,267 patients are admitted annually with more than 218,099 outpatient visits. Truman Medical Center Hospital Hill is also noted for its:

- Level I Trauma Center
- Richard & Annette Bloch Cancer Center at TMC
- HIV/AIDS Services
- High Risk Obstetrics and Level III NICU
- The Birthplace (22-bed LDRP)

**CHILDREN’S MERCY**

Children’s Mercy Hospital has been providing exclusive medical service to children for more than 100 years. CMH today provides the highest level of medical care, technology, services, equipment and facilities all tailored to meet the intricate needs of our pediatric patients.

Family Medicine residents have Pediatric ER and Inpatient rotations at CMH and can apply for additional elective rotations.

CMH is nationally recognized in:

- cardiac surgery
- transplantation
- nephrology
- neonatology and more
Kansas City is the largest city in the state of Missouri, encompassing over 318 square miles. Referred to as the City of Fountains, there are more than 200 fountains, second only to Rome, Italy. Kansas City also has more boulevards than any other city except Paris, France. As such, Kansas City is referred to as Paris of the Plains.

There are about 500,000 people who live in the city of Kansas City, MO, but there are close to two million in the Greater Kansas City metro area, which includes parts of both Kansas and Missouri.

Kansas City provides bigger venues of interest including museums, theaters and a thriving music scene.

Professional sports (baseball, football, soccer and hockey), fine dining, historic shopping districts and theme parks understandably makes Kansas City an innovative, vibrant and exciting metropolitan area.

TMC Lakewood is located on the eastern edge of Kansas City, adjacent to Lee’s Summit, with hometown attractions like a farmers market, small boutique type shopping, and town celebrations.

Money Magazine ranked Lee’s Summit one of the top 50 best places to live in the U.S. in 2016 and top in Missouri.
