UMKC

Hospital Hill Campus

Bicycle Map

This map is intended to help you find the safest and quickest route to your destination on campus. We hope this map will help you enjoy cycling on the UMKC campus. This map will be updated on a regular basis to reflect changed conditions. But please remember that traffic and roadway conditions can vary by time of day and season. If you have any suggestions, please call 816-561-1087.

UMKC Clean Commute challenges the students, staff and faculty of UMKC to reduce single occupancy vehicle trips to and from campus by using alternative modes of transportation such as bicycles, walking and mass transit, as part of a larger effort to “green” the campus.

The Basics

- **Always wear a helmet.** Helmets save lives! Head injuries cause about 75 percent of the approximately 700 bicycling-related fatalities every year in the U.S. Wearing a CPSC-certified helmet can reduce the risk of head injuries by 85 percent. Ask your local bike shop for advice on a good model and fit.
- **Be visible.** Wear white or bright colors. A front light and rear reflector are required at night.
- **Obey all traffic signs and signals.** For safety, bicyclists must follow the same rules of the road as motorists.
- **Ride with traffic.** Ride on the right side of the road with traffic, not against it. Motorists expect bicyclists to be going in the same direction they are.
- **Ride in a straight line.** Don't weave in and out of traffic or between parked cars. Be predictable.
- **Use hand signals.** Let other road users know what you are going to do.

Theft Prevention

Most bike thefts are due to unlocked or improperly locked bikes. Follow these tips to help prevent your bike from being stolen:

- **Never leave your bike unlocked,** not even for a second.
- **Always use a high quality U-lock or chain.** For added security, use both.
- **Always lock the frame and front wheel to either a rack or pole.**
- **For extra security, remove the front wheel** and lock it with the frame and rear wheel.

Bike + Bus = a Great Combination!

Biking is a healthy, enjoyable way to travel. Extend the distance you can travel whether you are commuting to work, riding your bike for recreation or running errands by linking up with a bus or vanpool, or cycling to a nearby bus stop and locking your bike securely while busing the rest of the way to your destination.

Easy directions for loading your bike on the bus can be found at:

www.kcata.org/rider_guide/bike_n_bus_how_to_load_your_bike/

State and campus bicycling laws can be found here:
