Ophthalmology		Dermatology, Rheumatology	Neurology			Pediatrics		Surgery	Emergency Medicine

* Elective not currently available in the KC area

** Elective not currently available at affiliates (may be available in KC area)

Updated August 2014

This is a career advising guide developed with advice from a variety of specialty program directors in these fields. It is not intended to comprehensively guide students on meeting their elective graduation requirements. Students must complete at least one clinical elective in three of the nine approved categories. One clinical elective must be a critical care elective. Students should see their ETC for assistance with elective choices, enrollment, and requirements.

This information is valid for the 2014-2015 academic year, but **does not** replace Council on Curriculum, Council on Evaluation, or other SOM policies or categorical assignments in the elective database.
